

## i3DVR Digital Surveillance System

- **"Smart" POS Integration**
  - Instantly search and view void, no-sale, cancels
  - Instantly review receipt view or video
  - You do NOT have to pre-define theft criteria as in some systems.
- **Remote Viewing via LAN, WAN, high speed internet**
- **Remote Searching of POS Transactions!**
  - You can be off site and still review suspect transactions!
- **Interactive Monitoring**
- **Digital recording ( no tapes or vcr heads to go bad )**
  - 24/7/365 digital quality.
- **Dramatically cut down time in reviewing suspect activity**
  - Smart POS Integration allows you to view suspect activity without pulling out journal tapes and finding that particular time. This cuts research time dramatically!
- **Watch video while system is still recording**
- **Multi-Level password protection**
- **Easily save backup data to dvd or cd**
  - Backups can be saved in proprietary format, avi or snapshot.
  - Backup viewer can be saved to dvd/cd with video.
- **i3DVR can give you the tools to reduce theft and increase your bottom line.**
- **Flexible recording options on a per camera basis. Set frame rate, resolution, motion/continuous/sensor recording.**
- **Generous system configurations**
  - 10, 16, 32 Camera configurations
  - Hybrid 16-Channel plus ip based recording
  - Compact, Rackmount, Raid5 options
  - Up to 4-TB "internal" storage options.

**It was said by one of our customers that eventually margins will become small enough that everyone will have to manage their margins more closely. He felt that scanning and surveillance were the two areas most dominant for doing this.**

**If you can cut theft and honest mistakes by 3.5% across the board and your competitor cannot, you have a great advantage.**
